How to play EduKart Quiz Racing

Race 3D karts while answering questions. Play solo against bots or with friends (up to 8 racers) via PIN.

1 Pick a vehicle & circuit

Create a room, share the PIN, pick 1 of 8 vehicles and the Jungle Forest, Surf Beach, or Mandalika Circuit.

2 Ready... GO!

Start lights 3-2-1. Hit the gas right on GO for a turbo start.

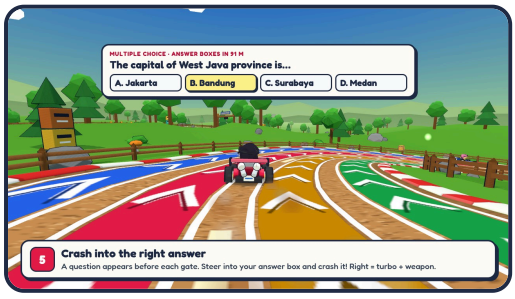

3 Speed up & collect Stars

Steer with the joystick and grab Stars on the track. Every Star adds speed; 10 Stars power up your weapons.

4 Drift + 3 turbos

Hold Drift while turning. When the meter turns red, press Drift again for a turbo, up to 3 in a row.

5 Crash into the right answer

A true/false or multiple choice question appears before each gate. Steer into your answer box and crash it!

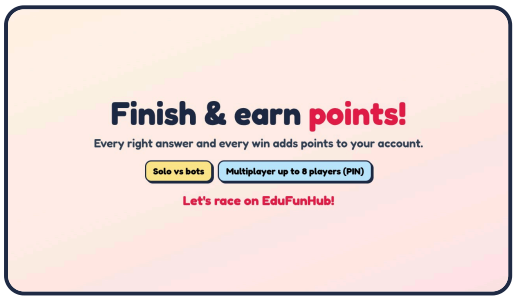

6 Right = turbo + weapon

A right answer gives a turbo and a weapon. A wrong answer slows you down and costs Stars.

7 Use weapons

Rockets chase the racer ahead, TNT drops behind you, NOS is a long turbo, a Shield blocks 1 attack.

8 Finish & earn points

Finish every lap. Every right answer and every win adds points to your account.

Keyboard: Arrows/WASD = steer & gas · Space/Shift = drift (press again when the meter is red = turbo) · E/F = weapon. **Phone:** left joystick to steer, Gas, Drift, and Weapon buttons on the right.
